

2012 COURSE SYLLABUS

The course is split into 10 modules. You may find that reading all the modules first, or 2/3 at a time, will make it easier to complete the questions.

It is important to attend Workshops. Each is individual and offers additional information and support. You have the opportunity to discuss any queries face to face and network with the other students. You are not under examination at Workshops. Good friendships and business relationships have been formed at SSF Workshops.

PAPER	PART ONE	PART TWO
ONE	PARTS OF A SHOE	LASTS AND HOW THEY RESPOND TO FEET
